CT26, CT36 AND CT48 DUST EXTRACTORS

Compact, yet big. Lightweight, yet powerful. Whether on site or in the workshop, the CLEANTEC CT 26 & 36 offer a lot of volume in compact dimensions, thanks to their generous container geometry. Their extremely compact high-power turbines provide the matching suction power, with a flow rate of 3900 l/min. With antistatic hose to prevent static charging during work.

Now, large quantities of dust and chips are no longer a problem, neither for the main filter nor for suction power. Up to 80% of mineral dust is separated out and collected in the collection container, and up to 95% of coarse dust such as sawing chips. That means less work for the main filter and ensures constantly high suction power throughout the entire work process. Approved for dust classes L & M.

Includes: Cyclone Systerainer, VAB-20 collection container, Systerainer pan, connecting hose, disposal bag, container lid.
